Three Hundred Persons Killed in a Riot Battle—Horrible AtroCities 'Practiced:

BERLIN, March 28.—According to the Czernowitz correspondent of the Lokal Anzleger, the situation in Rousemania grow worse yesterday. The number of persons killed daily is growing enormously. Three hundred persons have been killed in an encounter between peasants and the military at Staresjie, and there have been two bloody battles at Mastenestir in one of which Lieutenant Jonilescue lost his life. The peasants tore the bloody remnants to wild music. Similar atrocites are reported from the districts of Dimbrovitz and Dolj, where numerous villages and fams have been burned.

The situation in Galatz is most threatening. The longsheremen there are fraternizing with the peasants. The prefect of Galatz has ordered all the shops closed for three days, and the people are in a state of panic.

The very best ingredients from the last of the cure of woman's peculiar allments enter into its composition. No alcohol, harmful, or habit forming drug is to be found in the list of its ingredients printed on each bottle-wrapper and at itested under oath. In any condition of the female system, Dr. Piere's Favorito Prescription can do only good—never harm. Its whole effect is to strengthen, invigorate and regulate the whole female system and especially the pelvic organs. When these are de-ranged in function or affected by disease, the stomach and other organs of digestion become sympathetically deranged, the nerves are weakened, and a long list of bad, unpleasant symptoms follow. Too much must not be expected of this "Favorito Prescription." It will not perform miracles; will not cure tumors—no medicine will. It will often prevent them, if taken in time, and thus the operating table and the surgeon's knife may be avoided.

many recommendations to the State Railroad Commissioners concerning restrictions upon railroad operation in this State.

The grand jury declares that the railroad company "feloniously," wilfully and carelessly, with gross enlipable negligence and misconduct, omitted to ascertain at what speed it was safe for the train to pass around the curve. It charges also that the company omitted to exercise any effective measures to prevent the trains passing around the curve at a speed inster than was safe, and that it placed the train under the control of an engineer not properly trained and experienced, and not competent to run the train with safety. To the high speed the jury attributes the derailment of the train and the death and injury of the passengers.

Twenty-four persons lost their lives and more than a hundred others were more or less seriously injured in the wreck. The train was one of the new electric type which recently replaced those drawn by steam locomotives in the Central's suburban service. At Woodlawn curve, the second car of the train jumped the track, and it and those following were piled up in a heap beside the train at the time of the accident as high as seventy-five miles an hour.
